AS50B THIN ACOUSTICAL GUITAR

The AS50B thin acoustical guitar is without a doubt among the finest playing and looking guitars designed for the professional player. This guitar features the all new super low action model No. 800 Hofner neck. The wide range AP6 pickups are used to reproduce the natural sounds of the acoustical guitar. The beautiful thin hollow body has an arched spruce top with selected flamed maple sides and back supported by special braces that form a natural resonating sound chamber. The body is outlined with white bindings on front and back and has white inlaid "F" holes.

OTHER FEATURES INCLUDE:

- Beautiful highly polished anti-scratch polyester finish.
- Removable model No. 800 neck.
- Adjustable polished cast aluminum bridge and base.
- White mother of pearl anti-scratch celluloid pickguard.
- Two wide range AP6 humbucking pickups.
- Three-way switch lets you select either the top, bottom, or both pickups simultaneously.
- Each pickup has separate volume and tone controls to give you the greatest possible tone variations.
- Optional: Bigsby vibrato tailpiece renowned for its natural vibrato effects.
- Complete with connecting cord.
- Dimensions: Length 40½", Width 16", weight 6 lbs.

HOFNER MODEL NO. 800 NARROW NECK

- Solid hardrock maple with black polyester front and clear polyester back.
- Genuine pearl inlaid head piece.
- Oval top rosewood fretboard with genuine pearl inlays and 22 low profile precision brass frets for the lowest possible string action.
- Inlaid position dots on side of neck.
- Built in adjustable steel truss rod, which keeps neck in correct relationship to the strings for easier playing.
- Deluxe chrome plated, non slip, individual boxed gears by Kluson for accurate tuning.
- All No. 800 necks are guaranteed to play with all strings less than 1/16" away from the 22nd fret without any buzzing frets.
- Neck dimensions: 1-5/8" wide at nut, 2-1/8" wide at heel, 3/4" thick.

Wholesale Price: \$79.95 List: \$139.90

CM95 CUSTOM MAPLE SOLID BODY GUITAR

The CM95 CUSTOM is a top quality instrument suited for the most discriminating musician. This instrument has fantastic sustain capabilities due to its hard rock maple body and neck along with two wide range AP6 pickups and a one-piece cast aluminum bridge. This solid construction gives the guitar an unusually full clean sound. The Hofner No. 800 narrow neck is used to give an exceptionally close string action making this a very fast and easy playing guitar. The string action is guaranteed to be less than 1/16" between the strings and the 22nd fret without any buzzing frets.

OTHER FEATURES INCLUDE:

- Custom top quality eastern hard rock maple body.
- Hand rubbed clear satin finish.
- Removable model No. 800 neck.
- Elevated black polished celluloid pickguard.
- Adjustable polished cast aluminum bridge and base.
- Two full range AP6 humbucking pickups.
- Three-way switch lets you select either the top, bottom or both pickups simultaneously.
- Each pickup has separate volume and tone controls to give you the greatest possible tone variations.
- Optional: Bigsby vibrato tailpiece renowned for its natural vibrato effects.
- Complete with connecting cord.
- Dimensions: Length 39½", Width 12½", Weight 7½ lbs.

PROFESSIONAL GUITAR REQUIREMENTS FOR GOOD TONE

A top quality sounding guitar must have pickups with individual adjustable poles and excellent full range tone qualities. Second, the guitar must have good coupling between the bridge and body. A bridge with too many adjustable features tends to have poor coupling, which causes poor transfer of vibrations from the strings to the body. Third, the wood that is used should be exceptionally hard and solid in order to get a full sustained sound. Maple is an excellent hard wood, but isn't used by most companies because it is costly and its extreme hardness requires special tools and skills to shape.

AP6 HUMBUCKING PICKUPS

All Carvin 6 string guitars include two powerful AP6 pickups for high efficient wide range sound quality. These pickups feature powerful Alnico V magnets and a precision copper sound coil which works on the humbucking principle. Each string pole is individually adjustable making it possible to eliminate weak or loud strings. Tension springs for each individual pole are used to eliminate the possibility of the pole getting out of adjustment or rattling.

SS75B DELUXE MAPLE SOLID BODY GUITAR

The beautiful hardrock maple body gives this guitar an exceptionally clear, distinct, sustaining one along with a new custom look. This guitar features a fast action Hofner No. 500 narrow neck which has an unusually close string action. The AP6 pickups along with wide range tone controls help produce piercing lead tones, deep mellow rhythm tones, or anything in between.

OTHER FEATURES INCLUDE:

- Exclusive Eastern hardrock maple body for beauty and excellent sustained tone qualities.
- Hand rubbed clear satin finish.
- Removable model No. 500 neck.
- Adjustable polished cast aluminum bridge and base.
- Black polished anti-scratch celluloid pickguard.
- Two wide range AP6 humbucking pickups.
- Three-way switch lets you select either the top, bottom or both pickups simultaneously.
- Each pickup has separate volume and tone controls to give you the greatest possible tone variations.
- Optional: Bigsby vibrato tailpiece, renowned for its natural vibrato effects.
- Complete with connecting cord.

Wholesale Price: \$49.95 List: \$89.90

SB60 MAPLE SOLID BODY BASS GUITAR

The natural blonde maple body and contrasting black pickups and guard give a beautiful custom look to the SB60 bass. The maple body also serves to sustain the notes for a longer period of time than other hardwoods because of the heavy density of the wood. Many musicians have acclaimed this the most versatile sounding bass they have ever played because it is capable of giving deep mellow or thin punchy bass sounds. The Hofner No. 750 narrow bass neck has an unusually low string action for bass guitars and is guaranteed to play with less than 3/32" between the strings and the 22nd fret without any buzzing frets.

OTHER FEATURES INCLUDE:

- Removable model No. 750 bass neck.
- Exclusive Eastern hardrock maple body for beauty and excellent sustained tone qualities.
- Hand rubbed clear satin finish.
- Adjustable polished cast aluminum bridge and base.
- Black polished anti-scratch celluloid pickguard.
- Two wide range APB4 bass humbucking pickups.
- Three-way switch lets you select either the top, bottom, or both pickups simultaneously.
- Each pickup has separate volume and tone controls to give you the greatest possible tone variations.
- LaBella precision flatwound bass strings. List: \$18.00.
- Complete with connecting cord.

APB4 BASS HUMBUCKING PICKUPS

All Carvin bass guitars include two powerful wide range APB 4 Bass pickups which will give from deep mellow bass to thin punchy bass. These pickups feature powerful Alnico V magnets and a precision copper wound coil which works on the humbucking principle. Each string pole is individually adjustable making it possible to eliminate weak or loud strings. Tension springs for each individual pole are used to eliminate the possibility of the pole getting out of adjustment or rattling.

WARRANTY: All Carvin Spanish and bass guitars include a 2 year factory warranty on electrical components and necks against loose frets or excessive bowing. If defective your instrument will be repaired at no charge. Also these guitars may be returned under the warranty for a neck, bridge, and pickup adjustment with no service charge.

Try our instruments on our ten day trial plan, and if not 100% satisfied, your full payment is refunded immediately.

SB40 SUNBURST SOLID BODY BASS GUITAR

The Carvin SB40 bass guitar has better sound qualities than many top name solid body bass guitars. Special bass guitar features include a narrow super-fast playing 30 inch scale bass neck made by Hofner. (Hofner is the world famous maker of the popular Beatle bass guitar). The wide range low frequency APB4 pickups are used for smooth deep bass output. These pickups have individual adjustable poles, which eliminate weak or loud strings. This is a common fault with many other bass guitars. The pickup controls make possible any sound from a thin sharp bass to a deep mellow bass. The body is made of light high quality wood and has a beautiful heavy sunburst polyester finish for long durability.

OTHER FEATURES INCLUDE:

- Removable model No. 750 bass neck.
- Adjustable polished cast aluminum bridge and base.
- Black polished anti-scratch celluloid pickguard.
- Two wide-range APB4 bass humbucking pickups.
- Three-way switch lets you select either the top, bottom, or both pickups simultaneously.
- Each pickup has separate volume and tone controls to give you the greatest possible tone variations.
- LaBella precision flatwound bass guitar strings. List: \$18.00.
- Complete with connecting cord.
- Dimensions: Length 42", Width 12 1/2", Weight 6 1/2 lbs.

AB45 THIN ACOUSTICAL BASS GUITAR

The Carvin AB45 acoustic bass guitar has the quality of bass guitars selling for over twice our wholesale price. Special bass guitar features include a narrow super fast playing 30" scale bass neck made by Hofner. (Hofner is the world famous maker of the popular Beatle bass guitar). The wide range low frequency APB4 bass pickups are used for smooth deep bass output. These pickups have individual adjustable poles, which eliminate weak or loud strings. This is a common fault with many other bass guitars. The pickup controls make possible any sound from a thin sharp bass to a deep mellow bass. The beautiful thin hollow body has an arched spruce top with selected Maple sides and back supported by special braces that form a natural resonating sound chamber, giving the guitar a natural deep mellow bass sound. The body is outlined with white bindings on front and back and has white inlaid "F" holes.

OTHER FEATURES INCLUDE:

- Removable model No. 750 bass neck.
- Adjustable polished cast aluminum bridge and base.
- White mother of pearl anti-scratch celluloid pickguard.
- Two wide range APB4 bass humbucking pickups.

DBS98B

DTS90B

CUSTOM MAPLE SOLID BODY BASS AND SPANISH GUITAR

This all new short scale bass and Spanish guitar is ideal for the person who plays both bass and Spanish guitar. One great feature of this combo is that both necks are of the same standard guitar scale, making it easy to switch over. The short scale bass neck has the same features as our Hofner No. 500 Spanish neck and also has the outstanding tone qualities of our SB60 long scale bass. Special LaBella short scale bass strings are used to produce a deep mellow bass. The Spanish half of this combo has the same features and sound qualities as our SS75 guitar. Another outstanding feature is that both bass and Spanish have separate wiring circuits so that you can plug each one into its own channel or separate amplifiers. This enables you to set each instrument for its best performance. The bass circuit consists of one APB4 bass pickup, one volume, one tone, and one input jack. The Spanish circuit consists of two AP6 pickups, one three position lever switch (for top, bottom, or both pickups at once), one volume, one tone, and its own input jack. Includes 2 year factory warranty. For more information read about the SS75 solid Spanish. Dimensions: Length 40½". Width 12½". Weight 10 lbs.

CUSTOM MAPLE BODY TWELVE STRING AND SPANISH GUITAR

This is the perfect instrument for the person who wants complete sound versatility. This exclusive combo features the narrow super-fast playing Hofner No. 500 Spanish neck and a special narrow low playing action twelve string neck which is also made by Hofner. The body is made of beautiful blonde hardrock maple, which gives you clear sustained tones. In order to display the beautiful maple, the body has a natural clear satin finish. Another outstanding feature is that both twelve string and Spanish have separate wiring circuits so that you can plug each one into its own channel or separate amplifiers. This enables you to set each instrument for its best performance. The twelve string circuit consists of one AP6 pickup, one volume, one tone, and one input jack. The Spanish circuit consists of two AP6 pickups, one three position lever switch (for top, bottom, or both pickups at once), one volume, one tone, and its own input jack. Includes 2 year factory warranty. For more information read about the SS75 solid body Spanish guitar. Dimensions: Length 40½". Width 12½". Weight 10 lbs.

Hawaiian Steel Guitars

PRO-S8

PRO-D6

The PRO-series of Carvin steel guitars, we believe, are the finest in the business. They are made of genuine eastern maple. This is an instrument of beauty. The instrument employs new metal cast heat-hardened nut and tailpiece assemblies and uses the famous Carvin pickups. These are the same pickups that are used by many to replace the original equipment on many expensive competitive instruments. The tuning mechanisms are the best quality with boxed gears and ivory tuning pegs and are recessed flush with the top of the instrument. The hand guards are finished in beautiful chrome.

The Carvin guitar uses the fast-action 22 $\frac{1}{2}$ " scale which works better with many of the high-pitched tunings. The short scale is again becoming the popular string length.

The volume controls are special taper designed for instruments. The tone controls are wide-range type.

Genuine maple wood, because of its hardness and weight, gives that sustained singing tone not provided by ordinary hardwoods.

On double-neck models each neck has its own switch; thus, any neck can be on or off, or both necks on. The outside neck is elevated. The connecting cords are supplied with instruments, at no extra cost.

High Powered Portable Lead Amps

Amp Accessories

The **LEAD PERFORMER LP600 Amp** (Component No's. ST2400 power unit and D400 speaker system) is featured for musicians that demand the sound qualities from 10" speakers. This system has an excellent Lead-Rhythm Guitar bite with natural sustaining qualities that most musicians desire. The outstanding feature of this amp is its responsive, clean high power output from a compact sealed enclosure which features Six Heavy-Duty #1020 CTS 10" Instrument speakers. These speakers feature 3½ lbs. magnet structures, Treated Cone Edges, Aluminum Voice Coils for continuous peak power playing without failures, and Vented Aluminum Domes to allow heat to escape from voice coils.

FOR TECHNICAL and DESCRIPTIVE INFORMATION read pages 12 and 13 for ST2400 and pages 21 and 23 for D400. SIZE: Power Unit 24x10x10" Speaker System 24x12x38" WEIGHT: 110 lbs.

The **SM450 SOLO MASTER Amp** (Component No's. ST2400 power unit and PS300 speaker system) delivers great performance for Steel, Lead, and Rhythm Guitar. The big advantage of this amp is its good power output along with a full range speaker system which delivers a natural instrument tone with the ability to handle a microphone for excellent voice reproduction at the same time. The PS300 speaker system features a two-way crossover network which divides all bass frequencies into Two #1221 Heavy-Duty 12" CTS Full Range Instrument speakers and all Middle and Treble frequencies into one EV30A Electro Voice Midrange Horn.

For TECHNICAL and DESCRIPTIVE INFORMATION read pages 12 and 13 for ST2400 and pages 21 and 23 for PS300. SIZE: Power Unit 24x10x10" Speaker System 24x12x38" WEIGHT: 85 lbs.

COVERS

Custom-fitted cover sets are available for all Carvin Amplifiers and Sound Systems. These covers are made of a heavy durable black vinyl material reinforced with a nylon liner. Covers are recommended for added protection.

SIREKO BY ECHOPLEX

The Sireko ES-1 Echo Device by Maestro is a high quality echo-tape machine which compares to the best German Echo machines. The ES-1 reproduces countless possibilities from a mild reverberation effect to a multiple-repeating Les Paul sound effect from variable Speed, Echo Repeat, and Sustain controls.

SPECIAL FEATURES:

Exclusive SIREKO Replaceable Tape Cartridge. Easily interchanged "plug in" tape cartridge is simple to load - no tape threading. Additional cartridges available.

Foot Switch Echo Off Control. When foot switch is inserted into ECHO OFF jack on unit, echo may be switched on or off while playing.

Broad Echo Delay Range. Many mixtures are possible because speed of echo delay can be varied as desired.

Individual Controls are Easily Accessible. INSTRUMENT MICROPHONE CONTROL, ECHO DELAY, ECHO VOLUME, ECHO REPEAT, and RECORDING LEVEL are controlled by individual knobs that are recessed and easy to reach and use.

SPECIFICATIONS: Wow & Flutter less than .3% * Signal to Noise ratio better than 45 DB * Frequency response 50 to 10,000 cps * Quick Change Cartridge * For 120 VAC 50-60 cps * SIZE: 7x11x7" WEIGHT: 12 lbs. Made in USA.

PICKUPS

All Carvin Pickups are designed for Hi-Fidelity instrument reproduction with a frequency response of 30 CPS to 15000 CPS (15 CPS to 10,000 CPS for Bass APB-4). Adjustable poles with Alnico V double-powered magnets deliver excellent sensitivity with voltages up to 350 mv. Special features also include high impedance hum-bucking coil which may be used with all amplifiers. All pickups feature Black Molded housing except for AP-10 which is aluminum. Add 50c for each pickup for handling and parcel post charges.

In Checking strings of various manufacturers we found in all cases for the steel guitar that the #1 string was weak and #3 string was loud. On the Spanish guitar the #1 string was weak and #2 string was loud. Over a period of years our experience has been that strings put out by the same manufacturer vary from time to time. If one had a pickup which would only adjust on treble or bass sides there would be no way to correctly balance string output. There is only one answer—a pickup with individual adjustment for each string, thus you can compensate any condition. CARVIN MAGNETIC HIGH FIDELITY pickups are guaranteed the finest with above average output. CARVIN PATENT PENDING HIGH FIDELITY MAGNETIC ADJUSTABLE-POLE, WIDE RANGE PICKUPS have large $\frac{1}{4}$ " pickup area. Each pole has spring-tension which cannot get out of adjustment or rattle. Carvin adjustable pickups are double-powered with ALNICO V magnets and precision wound. All pickups are sold on money-back guarantee. Experiments have proven one good pickup gives better results than two or more mediocre pickups under the same set of strings.

CIRCUIT SHEET AVAILABLE, Supplied only with purchase.
