MINIMUM ORDER IS \$10.00
ALL PRICES LISTED IN THIS FLYER ARE SUBJECT TO CHANGE WITHOUT NOTICE

SHOP TALK

Last Month we ran a number of Summer's end Specials on page 2 of the Flier. There is still some of this merchandise left at advertised prices.

On page 5 we advertise our Remanufactured 351 Ampex transport with NEW Inovonics electronics for 2195.00 (F.T.) & 2995.00 (2 Tr.). If this is stretching your budget too far, contact us for a reduced price on one using a Reconditioned Transport, (some parts on transport would be good used instead of New)

Beat the price increase on NEW URBAN Products effective Sept. 27. We are stocked up at the old prices, and will hold our prices down on any pieces that we bought at the old prices.

Due to a Special Purchase we have a limited number of WOLLENSAK 1520 AV Recorders left. See Ad Page 2. When these are gone there will definitely be no more at these prices.

Notice our ad in this issue on the New DBX 900 series modules. These will be available from us sometime in the late Fall.

Electro-Voice Encore 77 Speakers are an excellent buy for 119.95 each. Get yours before we run out!

We are accumulating quite a few Ampex 600 series, and AG-600 series Two track Recorders. Also AG-500 Two Tracks. If you need a good quality professional portable recorder, consider these.

THOUGHT for the MONTH

As summer draws to a close, we observe the great bounty in nature that has been ordained by a wise and powerful God. On the high, bushy pastureland of Melody Pines Farm are many patches of ripe, delicious blackberries. Each berry has hundreds of seeds-one seed can germinate into a new bush, but God has supplied a vast overabundance of blackberries, assuring propagation, but supplying food for birds and enjoyment for people.

Every species and variety in nature is supplied with far more yield than is necessary for just reproducing its kind. The surplus gives food to other creatures including man, and that which decays and returns to the soil supplies organic matter to enable the earth to bring forth all manner of life abundantly.

We look into the heavens and see stars without number. Each star is another sun, perhaps with many planets, and we see a path of foggy light called the Milky Way, which is the rim of our galaxy, so far distant that we cannot distinguish individual stars, and our galaxy is but one of countless galaxies in the universe. God has supplied this for our enjoyment, and for what other purposes we cannot begin to imagine. Such great bounty is mind boggling!

But a far greater bounty has God supplied, because He so loved us, even though we did not deserve His love, that He gave His Son as a sin offering to atone for our sins, that whosoever believes on Him might have everlasting life. The provision is a super-abundance again, sufficient for all, because an infinite God has given of His infinite being to atone for the sins of the whole world. As terrible as sin is in the eyes of God, it is not infinite, yet the provision of atonement is infinite, more than enough for every descendant of Adam. But we must partake of it by faith, else it will not save us. The blackberries on the bushes must be eaten or they will fall to the ground. What must you do to be saved? "Believe on the Lord Jesus Christ and you will be saved."

It is my firm belief that the demonstration of love that God displayed to us His creatures, by becoming a man, Christ Jesus, and sacrificing Himself for us is the greatest demonstration of all of God's bounty. Won't you partake of it today?

IRISH/SHAMROCK (AMPEX) ECONOMY TAPE: This is all New Tape, the reason it is sold so cheaply is that it doesn't quite meet first line tape standards usually just a minor defect, good tape for all non-critical recording.

	1-49	50/lots
#031-1/4"-1200' on 7" reel	1.58	1.36
#041-1/4"-1800' on 7" reel	1.95	1.67
#051-1/4"-2250' on 7" reel	3.35	2.87

DBX 900 SERIES SIGNAL PROCESSING MODULES.

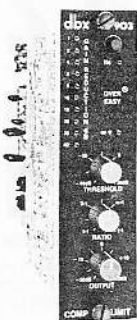

The Model 903 De-esser can be used as a conventional broadband de-esser, or for attenuating only a user-determined portion of the high frequency range of the audio signal. Gain reduction is adjustable from 0 to -20 dB. A feature unique to the 902 (not found in other de-essers) is its continuous analysis of the input signal spectrum, thereby providing the exact amount of de-essing selected regardless of signal level. The 902 does not require recalibration for signal level changes. Just set it and forget it.

The Model 904 Noise Gate is the ultimate noise gate, with a combination of features not found on any other noise gate, at any price. It features adjustable attack and release rates, threshold adjustment from -30 to +10 dB, attenuation limit adjustment from 0 to 80 dB, with dbx Over Easy® downward expansion for a smooth sound. It also features a KEY input that allows gating of one instrument by another. The special GATE mode of the 904 allows users without automated consoles to put threshold programmed muting on solo channels. After the user sets the correct solo level on the console, the 904 will automatically keep the channel muted, eliminating spurious signals which frequently precede the solo itself. When the solo begins, the 904 will un-mute the channel, allowing the solo into the mix at the pre-set level.

The Model 903 Compressor gives you all the features you'd expect from dbx. And then some. For starters, you have at your command a unique new negative compression feature that actually begins reducing output volume once the threshold is exceeded. Signals are given a new and unusual sense of "punch." And the 903, like our acclaimed 165, is an Over Easy® compressor, with a soft knee threshold that increases compression rate gradually over a range of several dB. It features true RMS level detection, continuously variable compression ratios, and a threshold that's adjustable from -40 dB to +20 dB.

15095 Line Trans. \$20.00 ea.

1567A Mixer Amplifier

5 inputs
2 outputs

The 1567A is a Mixer Amplifier of exceptional flexibility for use in public address systems and broadcast studios or as a remote, portable mixer. It has four low level inputs and one high level input each with individual volume controls, a master gain control, separate bass and treble tone controls, a power switch, illumination control and facility for an accessory VU meter.

An outstanding feature of the 1567A is its input versatility. As supplied, each of the four low level inputs are connected to receive high impedance microphones. Installation of the 4722 plug-in transformer converts any of the inputs to low impedance. Insertion of the 12864 accessory plug will convert either of two low level inputs to phono facility and provide the proper RIAA equalization for magnetic pickups.

Two outputs are provided: the main output which may be connected directly to a high impedance load or isolated by the addition of the 15095 plug-in line transformer for low impedance lines; the second output is provided for supplying signal to tape recorders and is unaffected by the master gain and tone controls.
